Poly Lumber Furniture

Environmentally friendly Poly is a high density polyethylene, recyclable plastic derived from post-consumer waste such as milk jugs and detergent bottles. Built to last with exceptional resistance to moisture, fading, insects, warping and other hazards of environmental exposure poly will not deteriorate. The high color stability UV pigment system minimizes material breakdown from prolonged sun and weather exposure to retain it's vibrant look. Requiring no waterproofing or staining, other than an occasional washing with soap and water poly is essentially **maintenance-free!**
